**IMPORTANT !! KEEP FOR FUTURE REFERENCE**

According to standard EN 14988:2017 only in combination with Kiddo children's chair.

## Kiddo Safety Kit

Place the harness into the top groove on one side of the chair. Guide the other side of the harness towards the same groove on the opposite side. Press the harness firmly together and insert it into the groove you are guiding it towards.

Press the plastic lockers and tilt the seat up. Put the strap fitting into the round hole under the seat and pull it forward until it stops. Press the seat front down until it snaps into lock.

Attach the shortest part of the waist belt around the lower back piece. Put the strap through the fitting as shown and tighten firmly by pulling the end of the strap.

The waist belt is adjusted to fit around the child's waist. The chair is now ready for use. The combination of waist belt, plastic harness and the chair itself makes the Kiddo a very safe product. It is approved according to all relevant standards. For small children these parts must always be used in combination and correctly fitted.

### Maintenance and cleaning

You can put the whole plastic harness including the strap into the dish washer. You can also use most cleaners, but they should not contain any solvents or abrasives. This might cause the surface of the product to be damaged or even weaken the product

Designed and patented by  
Br. Ekornes Industri AS, Norway

Produced and distributed by

Tarmeko LPD OÜ – ESTONIA  
On behalf of Br.Ekornes Industri AS

The plastic harness is tightened by pushing it towards the child. To release it both release levers must be pushed simultaneously. This is a required safety function.

### CLAIMS:

The customer has the right to claim the product according to the rules in the country where it is sold. This can vary from country to country.

Any claims must be timely filed to the seller of the product. Original receipt and documentation of the reason for claim must be available.

The product is intended for children able to sit up unaided and up to 3 years or a maximum weight of 15 kg.

## Warning

Do not leave the child unattended!  
Small children must always use the chair in combination with appropriate safety kit. Make sure that every part of the safety kit is correctly fitted: The harness attached to the chair, crotch belt under the seat, waist belt attached to the chair and tightly around the child.

Do not use the chair unless all parts are correctly fitted. Always place the chair on a level floor surface and make sure there is room for the chair to be pushed back. The child must be able to sit up by itself before being placed into the chair. Recommended use from 6 months age.

Do not use the chair if any parts are damaged or missing. Make sure not to place the chair close to small objects, toxic material, open fire or other sources of strong heat such as stoves, electric heaters and so on. This may cause serious injury or death to the child.

WARNING: Prevent your child from climbing on the product.
